

The 7th International Conference on Biochemistry and Molecular Biology

“Challenges in Biochemistry to Overcome Pandemics and Disruption”

OPENING ADDRESS

Emeritus Prof. Dr. M.R. Jisnuson Svasti
Advisor to BMB Thailand Executive Board

It is my great pleasure to welcome you to this 7th International Conference on Biochemistry and Molecular Biology which is being held with the theme “Challenges in Biochemistry to Overcome Pandemics and Disruptions”.

First, I would like to thank the BMB Chairman and the Organizing Committee and for arranging such an excellent meeting, under the difficult situation posed by COVID. Despite being held online, which is now the new normal, the meeting is attended by 300 participants. The scientific program has 12 excellent invited speakers both local and overseas, as well as nearly 100 submitted papers presented orally or as posters. I would also like thank various institutions and sponsors for providing support for the conference, and all participants for joining the meeting.

Finally, I would like to say that BMB and the Science Society of Thailand have been important in my life. Indeed, I was born the year before the official registration of the Science Society and started working in Thailand the year before the foundation of BMB. So I hope, especially for the young scientists recently joined us, that BMB and the Science Society will also be important in your lives, so you can share your knowledge and learn from others, and also feel that you belong to a family of scientists who care and wish well for each other.

Now, the auspicious time has arrived, so I declare open the 7th International Conference on Biochemistry and Molecular Biology. I wish you all a productive and enjoyable conference. Thank you.
